Software Specification

Overview

Pozible Fomo is a bare bones checkout tool designed for producers of one size fits all small batch craft products.

Technical Prerequisites

- The database
- API integration via Stripe for payments

Monetisation Model

Pozible will collect a small service fee on all sales made.

User Roles

- Customers

Application Flow

1 Customer

1.1 Products Display

Customers can view a single image of a product, the number of products left in the sale, the time remaining on the sale & the cost of the product. They can also begin the purchase process with the only clickable element on the page (the 'Check Out' CTA).

1.2 Sale Ended

User will be notified that they missed the sale, while also being prompted to enter their email address to hear about when similar items are for sale.

1.3 Personal Information

Customers enter their personal details regarding payment and product shipping.

- Email Address *
- Shipping Address *
- Credit Card Number *
- Credit Card Expiry Date *
- Credit Card CVV *

1.4 Purchase Completed

Users are notified of the success of their transaction.
